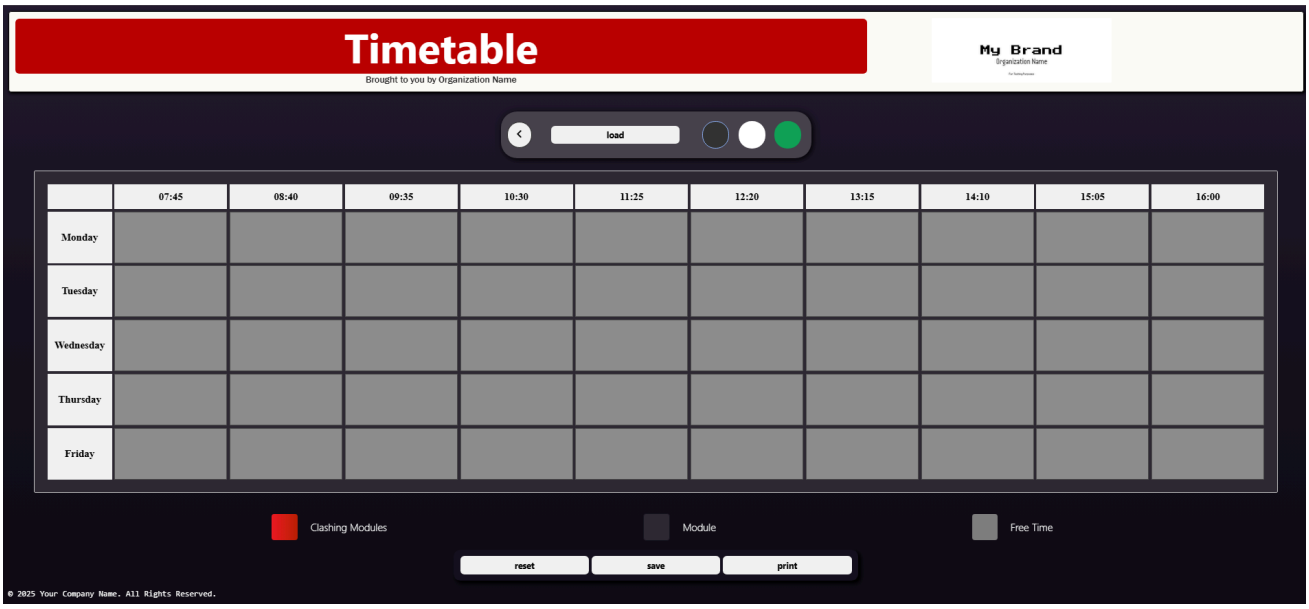
Timetable Creator Documentation

About

The ***timetable creator*** is a software made to convinience students and lecturers in creating a timetable . Looks to make timetable creating easier , descriptively by accepting or combining .xml files of created files via *timetable creator* to make a whole complete timetable or just by allowing the user to manually create their timetable .

How to use ?



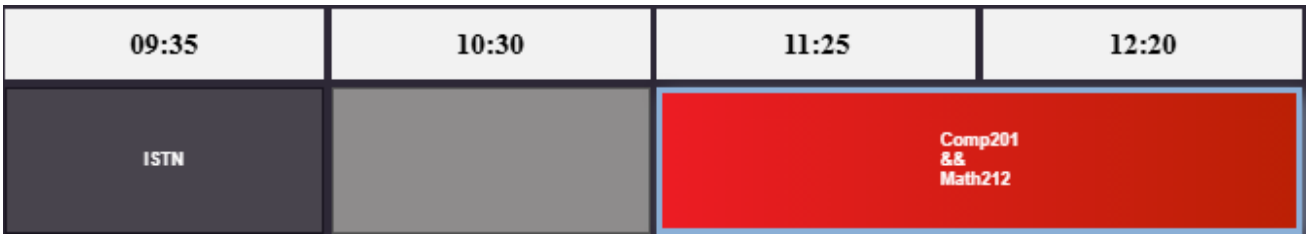
This is what it looks like upon initialisation

Manual Timetable Creation

To Start editing , you click on the empty grey spaces (or grey empty div) then add the text you want to have in them . For example "ISTN" as shown in the image below .

In some cases you find that there are two modules in one time slot , fear not because timetable creator has a unique way of showing that . By adding **&&** the div will change color to indicate timetable clash then you can continue adding the second module text.

Here is an example :



Sometimes you can a module occupy **one timeslot** and sometimes there are **double lectures** and for practicals up to almost **2 hours** + long , So you can join divs .

Steps to joining divs

SELECT divs you want to **join (crtl + left Click) to select multiple** then after selecting **right click** to call join option .

Press join then

The two divs in timeslot 11:25 and 12:20 have been joined in the above image.

Save Button

You can save the file as an .xml file , when saved as an .xml file it can later be loaded for editing once more .

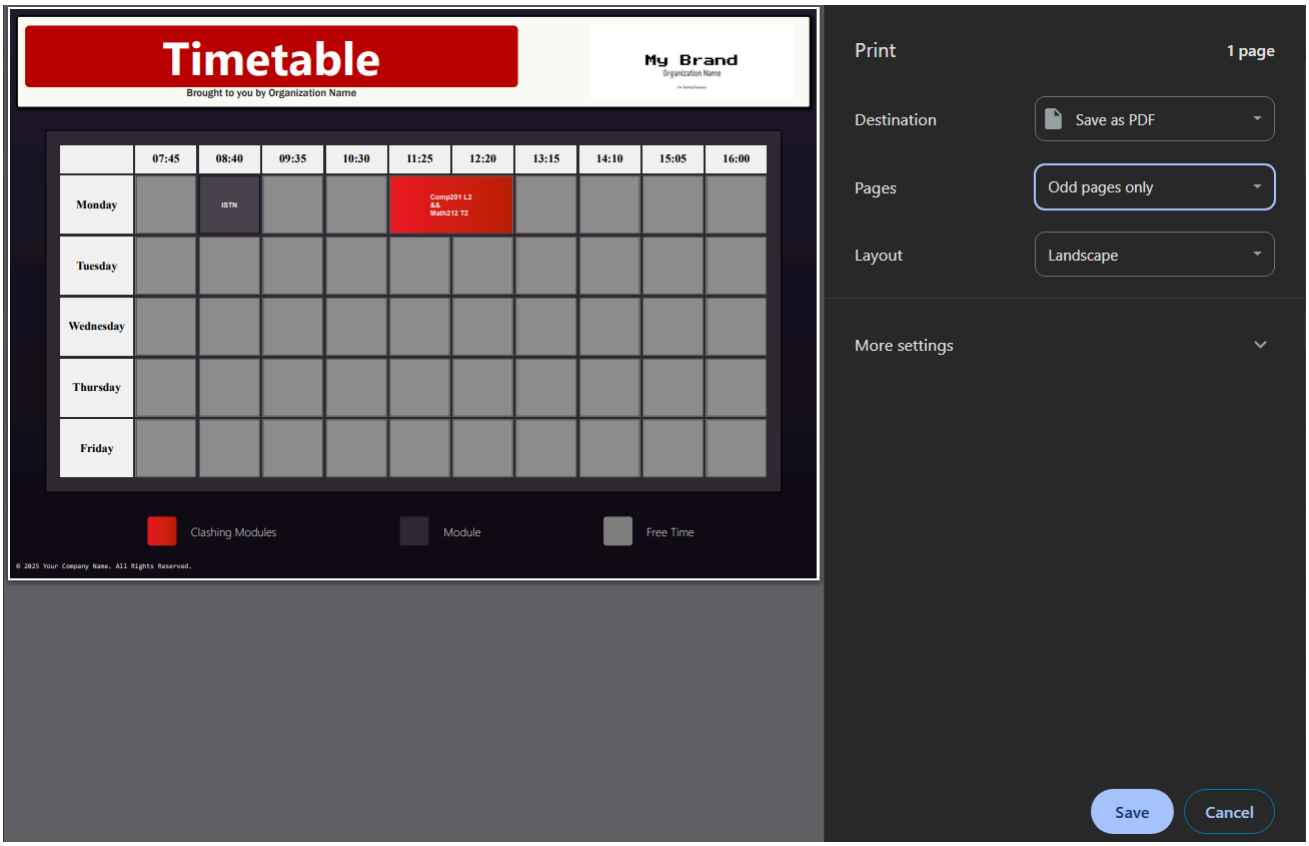
Reset Button

The reset button , reset the whole timetable to its initial uneditted state .

---

print Button

The print button allows the user to export their timetable as a pdf file , which they can either keep as a pdf or print it .



For proper print sizing , you adviced to set ***Pages*** to **Odd page only**

Loading .xml files Timetable Creation

When the **Load** button is pressed , it will open your file explorer and you have to navigate to the saved .xml file to load it .

And **YES** you can load multiple .xml files , when loading the timetable creator software will combine the files into one complete timetable . This is one of most cherished feature the timetable creator software offers .

That'll be it , ***A great day to you and good luck on your studies .***

Additional Information

1. **Change Color Themes**

- You can change the color themes by clicking one either one of the circles on next to **LOAD**

2. **Keys**

- Below the timetable are keys that indicate when a div is :
  - ***Has clashing modules***
  - ***Has a module*** (there is lecture)
  - ***Has nothing*** (free)
